

Staticworx GroundLock ESD Snap-Together Conductive Base

Any Staticworx ESD Tile Mounted on Snap-Together Base

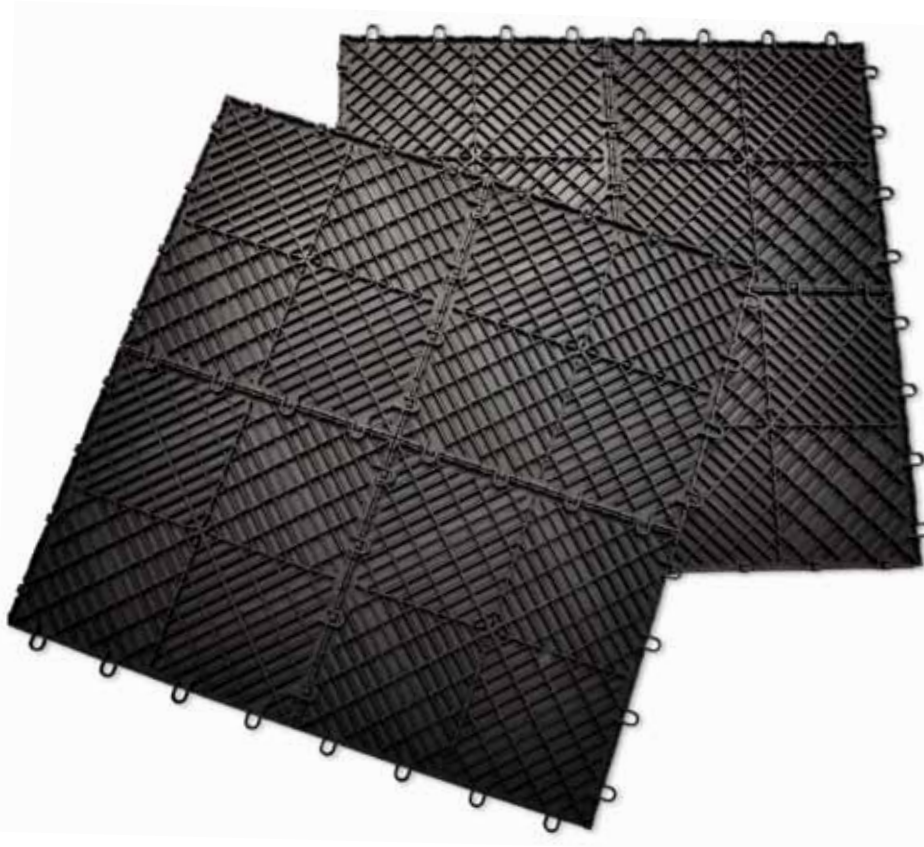

Designed to allow anti-static, electrically conductive (ESD) flooring installation in diverse spaces, quickly, Staticworx GroundLock can be paired with any Staticworx ESD tile on top. Ground with a copper grounding strip for maximum anti-static properties. This floor can be disassembled and moved to a different space or location. Completely reusable and it can be installed by anyone! Made in the USA.

mounted with
EC ESD Rubber*

Interlocking, Conductive Base

Odorless installation meets all the same conductivity parameters of a full-spread, conductive adhesive installation without the commitment associated with a permanent installation. Perfect for labs, leased spaces, concrete slabs with vapor issues, fast installations, occupied spaces etc. If an area becomes redeployed, it's no big deal.

Features

- Lock-together withstands heavy loads up to 50,000 pounds
- 10-Year limited warranty
- Odorless installation
- Slip resistant
- No special sub-floor prep required
- Made in USA
- Can be walked on / used immediately
- Easy to clean, maintain, and repair
- Use any Staticworx ESD tile style as top layer
- Available in 24" x 24" or 12" x 12"
