DIVISION 09 - FINISHES
SECTION 09 65 00 RESILIENT FLOORING

Staticworx® Eclipse GF

This document is provided to assist in the preparation of a Project or Master Specification and has been formatted in accordance with the Construction Specifications Institute (CSI)’s MasterFormat®.

PART 1 - GENERAL

1.1 GENERAL PROVISIONS

A. Attention is directed to the CONTRACT AND GENERAL CONDITIONS and all Sections within DIVISION 01 - GENERAL REQUIREMENTS which are hereby made a part of this Section of the Specifications.

1.2 DESCRIPTION OF WORK

A. Work Included: Provide labor, materials and equipment necessary to complete the work of this Section, including but not limited to the following:
   1. Resilient sheet flooring for commercial traffic.
   2. Resilient sheet flooring for commercial traffic with pre-applied adhesive.
   3. Resilient sheet flooring for electrostatic dissipative protection.

B. Related Work: The following items are not included in this Section and are specified under the designated Sections:
   1. Section 03 30 00 CAST-IN-PLACE CONCRETE for concrete substrate; slab surface tolerances; vapor retarder for applications on or below grade; requirement for 83/90 degree riser and tread edge angle for stair tread and nosings.
   2. Section 05 51 00 METAL STAIRS AND RAILINGS; requirement for 83/90 degree riser and tread edge angle for stair tread and nosings.
   3. Section 06 10 00 ROUGH CARPENTRY for plywood substrate and surface tolerances.

C. References (Industry Standards):
   1. American Association of Textile Chemists and Colorists (AATCC):
      a. AATCC 134 Electrostatic Propensity of Carpets
      a. ANSI ESD S97.2 Floor Materials and Footwear – Voltage Measurement on a Person
   3. ASTM International (ASTM):
      b. ASTM D412 Standard Test Methods for Vulcanized Rubber and Thermoplastic Elastomers – Tension
      c. ASTM D2047 Standard Test Method for Static Coefficient of Friction of Polish-Coated Floor Surfaces as Measured by the James Machine
      d. ASTM D2240 Standard Test Method for Rubber Property – Durometer Hardness
      e. ASTM D3389 Standard Test Method for Coated Fabrics Abrasion Resistance (Rotary Platform, Double Head Abrader)
      f. ASTM D6499 Standard Test Method for the Immunological Measurement of Antigenic Protein in Natural Rubber and its Products
      g. ASTM E84 Standard Test Method for Surface Burning Characteristics of Building Materials
i. ASTM E662 Standard Test Method for Specific Optical Density of Smoke Generated by Solid Materials
j. ASTM E1745 Standard Specification for Water Vapor Retarders Used in Contact with Soil or Granular Fill under Concrete Slabs
k. ASTM E2179 Standard Test Method for Laboratory Measurement of the Effectiveness of Floor Coverings in Reducing Impact Sound Transmission Through Concrete Floors
l. ASTM E2180 Standard Test Method for Determining the Activity of Incorporated Antimicrobial Agent(s) in Polymeric or Hydrophobic Materials
m. ASTM F150 Standard Test Method for Electrical Resistance of Conductive and Static Dissipative Resilient Flooring
n. ASTM F155 Method of Test for Temper of Strip and Sheet Metals for Electronic Devices
o. ASTM F386 Standard Test Method for Thickness of Resilient Flooring Materials Having Flat Surfaces
p. ASTM F710 Standard Practice for Preparing Concrete Floors to Receive Resilient Flooring
q. ASTM F925 Standard Test Method for Resistance to Chemicals of Resilient Flooring
r. ASTM F970 Standard Test Method for Static Load Limit
s. ASTM F1344 Standard Specification for Rubber Floor Tile
t. ASTM F1482 Standard Practice for Installation and Preparation of Panel Type Underlayments to Receive Resilient Flooring
w. ASTM F1859 Standard Specification for Rubber Sheet Floor Covering Without Backing
x. ASTM F1860 Standard Specification for Rubber Sheet Floor Covering With Backing
y. ASTM F1861 Standard Specification for Resilient Wall Base
z. ASTM F2055 Standard Test Method for Size and Squareness of Resilient Floor Tile by Dial Gage Method
aa. ASTM F2169 Standard Specification for Resilient Stair Treads
bb. ASTM F2170 Standard Test Method for Determining Relative Humidity in Concrete Floor Slabs Using in situ Probes
cc. ASTM F2199 Standard Test Method for Determining Dimensional Stability of Resilient Floor Tile after Exposure to Heat
dd. ASTM F3010 Standard Practice for Two-Component Resin Based Membrane-Forming Moisture Mitigation Systems for Use Under Resilient Floor Coverings
e. ASTM G21 Standard Practice for Determining Resistance of Synthetic Polymeric Materials to Fungi

4. European Norm (FTM):
   a. FTM 101 C 4046 Static Decay.

5. International Organization for Standardization (ISO):
   a. ISO 140 Measurement of sound insulation in buildings and of building elements

   b. NFPA 258 Test Method for Specific Density of Smoke Generated by Solid Materials

1.3 SUBMITTALS

A. Product Data: Submit manufacturer’s product data, installation guide and maintenance guide for each material and accessory proposed for use.

B. Samples: Submit three representative samples of each product specified for verification.
1.4 QUALITY ASSURANCE

A. Manufacturer Qualifications: Provide resilient flooring manufactured by a firm with a minimum of 10 years’ experience with resilient flooring of type equivalent to those specified.
   1. Manufacturer’s quality management system must have ISO 9001:2000 approval.
   2. Provide resilient flooring products, including wall base, accessories and subfloor preparation products from one manufacturer to ensure color matching and compatibility.
   3. Manufacturer shall be capable of providing technical training and technical field service representation.

B. Installer Qualifications: Acceptable to manufacturer of resilient flooring or INSTALL (International Standards & Training Alliance) resilient certified for the requirements of the project.

C. Sustainable Design Requirements:
   2. Flooring surfaces that are easily cleaned and do not require coatings and stripping, or use chemicals that may be hazardous to human health.
   3. Supply all required products that are CA 01350 compliant.
   4. Flooring that is free of materials known to be teratogenic, mutagenic or carcinogenic.
   5. Flooring that contains no polyvinyl chloride or plasticizers.
   6. Flooring that contains no halogens.
   7. Flooring that contains no asbestos.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials in labeled packages. Store and handle in strict compliance with manufacturer’s recommendations. Protect from damage due to weather, excessive temperatures, and construction operations.

B. Deliver materials sufficiently in advance of installation to condition materials to the required temperature for 48-hours prior to installation.

1.6 PROJECT CONDITIONS

A. Maintain temperature and humidity at service levels or the ambient temperature must remain steady (± 10ºF) and be between 59ºF and 80ºF for at least 48-hours prior, during and 72-hours after installation. The ambient relative humidity is recommended to be 50% RH ± 10%; however, dew point must be avoided.

1.7 WARRANTY

A. Provide manufacturer’s standard limited warranty for wear, defect and conductivity.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURER

A. Basis-of-Design: Staticworx, Inc., 4706 Waterbury Stowe Road, Waterbury Center, VT 05677; telephone 617-923-2000; fax 617-467-5871.

2.2 RESILIENT SHEET FLOORING FOR ELECTROSTATIC DISSIPATIVE PROTECTION

A. Rubber Sheet Flooring:
   1. Product Name: Eclipse GF with Integral adhesive applied
   2. ASTM Specification: Type I
      ASTM F1859 Standard Specification for Rubber Sheet Floor Covering Without Backing
   3. Limited Wear Warranty: 5 years
   4. Material: vulcanized rubber compound 948 with environmentally compatible color pigments that are free of toxic heavy metals
5. Composition: Vulcanized 2 ply conductive rubber compound with a random scattered design
6. Color: 2 standard colors
7. Surface: Smooth
8. Back of Tile/Sheet/Nosing: Double-sanded smooth
10. Thickness (ASTM F386): ± 0.006 inches (± 0.15mm) is required ~0.08 inches (2.0mm)
11. Dimensional Stability (ASTM F2199): ≤ 0.15% in both directions is required Meets requirements
12. Flammability (E648/NFPA 253): ≥ 0.45 watts/sq. cm for Class 1 is required NBSIR 75 950, 1.00
13. Smoke Density (ASTM E662/NFPA 258): < 450 is required NBS, 81 (flaming) and 122 (non-flaming)
14. CAN/ULC-S102.2: Surface Burning, FSC1 of 185 and SD of 1600
15. Burn Resistance: Resistant to cigarette and solder burns
16. Slip Resistance (ASTM D2047): ≥ 0.5 is required Static coefficient of friction, Neolite dry 0.92, Neolite wet 0.89 (not recommended for ramps)
18. VOC’s: This flooring is GREENGUARD Gold Certified for Low VOC Emissions and CA 01350 compliant
19. Latex Allergies (ASTM D6499): Inhibition Elisa, results are below detection level
20. Sound Absorption (ISO 140): ∆ Lw 6dB (compare only ∆ values)
21. Hardness (ASTM D2240): ≥ 85 is required Shore type “A”, 92 achieved
22. Static Load (ASTM F970): ≤ 0.005 inches with 250 lbs. is required Residual compression of 0.003 inches with 800 lbs.
23. Rolling Load Limit: ≤ 450 lbs. / sq. inch, with no forklift traffic
24. Abrasion Resistance (ASTM D3389): ≤ 0.035 oz. (1.0g) is required 1.1 lbs. (500g) load on H-18 wheel with 1000 cycles, 0.002 oz. (0.07g) weight
25. Elongation (ASTM D412): ≥ 300 lbs. per sq. inch is required Modulus @ 10% is 1,196.7 lbs. per sq. inch
26. Heat Resistance (ASTM F1514): Avg. ∆E ≤ 8.0 is required Easily achieved with all batches and regular maintenance
27. Light Resistance: Avg. ∆E ≤ 8.0 is required Easily achieved with all batches and regular maintenance
28. Static Generation (ANSI ESD S97.2): < 20 Volts
29. Decay Time (FTM 101 C 4046): < 0.25, (sec)
30. Conductivity (ANSI/ESD S7.1): 2.5 x 10⁴ < 10⁸ (ohms)
31. Thermal Transmission (ASTM C518): R-value 0.01
32. Cleaning: Cleaned and maintained effectively using water, Staticworx cleaning pads and a suitable cleaning machine, without the use of any factory and/or field-applied coatings. Also without using any chemicals that may be hazardous or containing any like lead, cadmium or mercury
teratogenic, mutagenic or any other ingredients known to be carcinogenic.

33. Shine: Higher shine achieved by buffing without any artificial topical applied coatings

34. Stain Removal: Samples of the product must be provided for stain removal testing by the owner. Sample size must be 24 inches by 24 inches, pre-cleaned by manufacture per published recommendations. Samples must have no coatings, sealers, floor finish or other manually or mechanically applied finish on the surface of the product. Stain testing must consist of application of common healthcare related disinfectants and chemicals to include, but not limited to, Betadine, Methylene Blue, Silver Nitrate and alcohol based hand sanitizer. Duration of test period must be no less than one week. Removal of chemicals must be in accordance with manufacturers published cleaning and maintenance recommendations.

35. Substrate Preparation: Per ASTM F710 and the Staticworx Installation Guide

PART 3 - EXECUTION

3.1 GENERAL CONTRACTOR RESPONSIBILITIES

B. A subfloor that meets the requirements of ASTM F710 Standard Practice for Preparing Concrete Floors to Receive Resilient Flooring is required, or as detailed in the Staticworx Installation Guide. A secure storage area that is maintained permanently or temporarily at ambient service temperature and humidity (except walk in freezers or similar), or 68°F ± 5° F and 50% ± 10% relative humidity, for at least 48-hours prior to and during the application of the flooring, so the flooring contractor can acclimate the flooring materials is required.

C. An installation area that is weather tight and maintained either permanently or temporarily at ambient service temperature and humidity (except walk in freezers or similar), or 68°F ± 5° F and 50% ± 10% relative humidity, for at least 48-hours prior to, during and 72-hours after the application of the flooring is required.

D. Areas with direct prolonged exposure to sunlight should be protected with the use of Low E glass doors and windows or facades.

E. Floor Protection: protect the flooring from damage during construction operations using Masonite, plywood or a similar product, ensuring first that the flooring surface is free of all debris. Lay panels so that the edges form a butt joint and tape the joint to prevent both movement and debris entrapment underneath them. Inspect immediately before covering and after removal for final acceptance.

3.2 FLOORING CONTRACTOR RESPONSIBILITIES

A. Provide trained installers that have at least one of the following:
   1. Approved by Staticworx, Inc, Inc. for all of the requirements of the project or INSTALL (International Standards & Training Alliance) certified for the requirements of the project.
   2. An effective installation manager, to manage the project, installers, and ensure that all of the required procedures are followed as detailed in the Staticworx Installation Guide (available at www.staticworx.com).

B. Follow all requirements in the appropriate Staticworx Installation Guide.
